

Emily likes to walk home alone at night, but she is beginning to worry a lot about her safety. She keeps thinking about what if something were to happen. What could she do?

Emily learns of an app that will record a voice memo if something loud happens or keywords are recorded.

Emily sets the parameters for the app and is already beginning to feel safer.

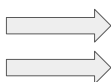

GIVE ME YOUR MONEY!

Emily, already feeling safer, begins her safe night walk home. Until a burglar shows up and demands her to give him her money!

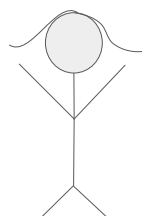

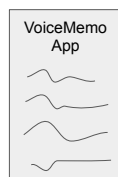

My phone is recording! You will be caught!

OH NO!

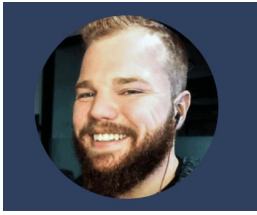

Emily knowing her phone is at the ready, states to the burglar that her phone is recording! The burglar is spooked by this and runs away.

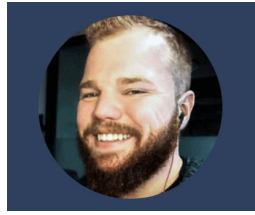

Emily makes it safely to her home with the help of the VoiceMemo app!

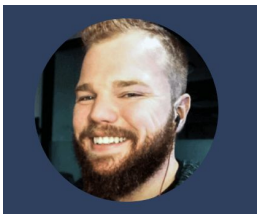

Eric Miller is in an abusive relationship with his girlfriend, and needs to document proof so he can get help and support.

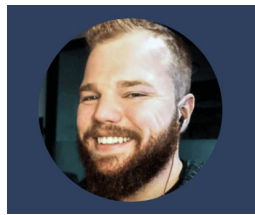

He hears about our app, and decides that it could be the solution to his problem(s).

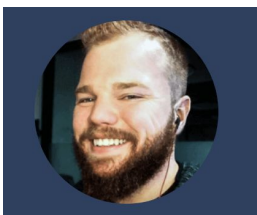

The next time his girlfriend abuses him, Eric subtly turns on the recording function of the app.

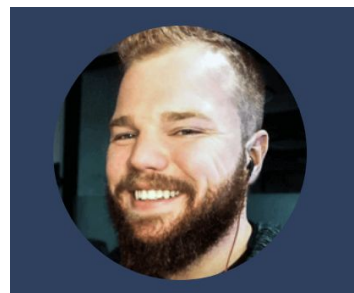

Eric uses that evidence to not only get his friends to believe him, but to get counseling and legal services

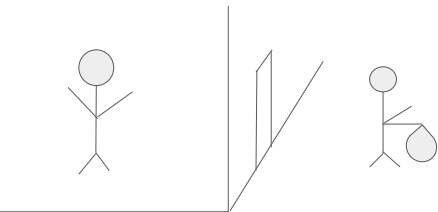

The evidence Eric recorded allows his lawyer to obtain a restraining order.

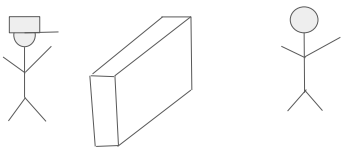

Eric is in a much better place.

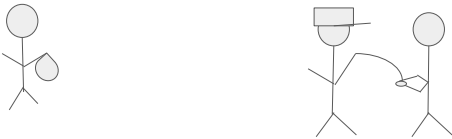

A bank is robbed and the criminal leaves the scene on the crime

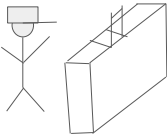

This case is reported to the police office and they start to gather info on the criminal.

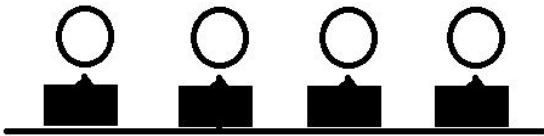

The app allows for new info to be placed on the robber by others police or witnesses

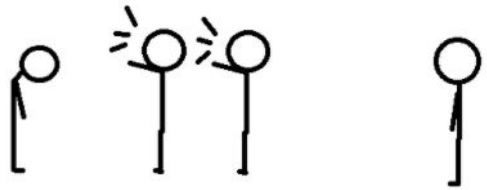

The criminal is caught and arrested

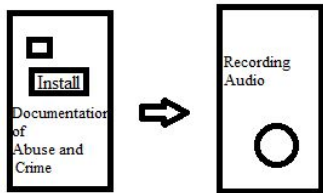

All the information is easily add to the system and documented

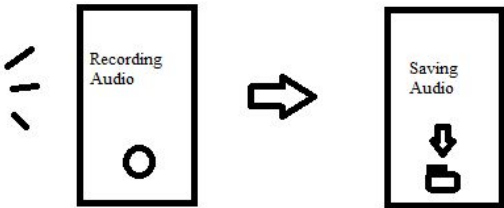

Bob spends most of his time at work with his team as they put together projects for the company he works for. However, he notices an abusive attitude from two of his senior team members towards a new team member.

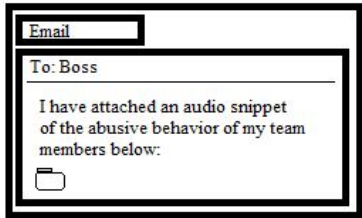

Bob would rather not report the two members to his boss as he doesn't want to cause a scene and would rather remain anonymous. He also needs evidence in order to file a report.

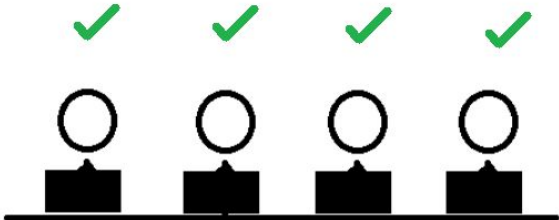

Bob starts searching for a software or app that can help him in his situation while remaining anonymous. He ends up stumbling upon the "documentation of abuse and crime" app and downloads it.

When his two abusive team members start screaming at the new team member, Bob's phone automatically begins recording the audio and then saves it in a secure folder.

Bob is able to attach the audio snippet and email it to his boss

After filing the report, Bob notices a better and more professional mannerism between his team members.
