Problem Statement

Our users feel helpless because there are not really any good ways to document abuse and crime when they are in private or alone. Our solution should provide users with a way to easily document abuse or crime in private.

Who is experiencing the problem?

Any individual that is being abused or in fear of having a crime committed against them.

What is the Problem?

Abuse and crime in private is not easily documented.

Where does the problem present itself?

This problem could literally exist anywhere. At home, in public, in private, on the street, ect…
